# WorldPosta® - Business Cloud Mail Solution.

## Introduction

Email is a key component of the modern business communication, corporations are using email on a daily basis as the ideal tool to conduct businesses.

Currently, there are over 4.3 billion email accounts, and 2.6 billion email users around the world. By 2019, the number is predicted to rise up to 26%.

## WorldPosta®-A Cloud Mail Service, Built For Business.

WorldPosta® is a cloud-based business mail service, designed to provide your company with all the features that allow you to achieve more productivity in your workplace.

Our cloud-based service ensures the highest availability for the service 99.9% (≈8 hours a year), stable connectivity, and anywhere access from any email client or browser.

# What Makes WorldPosta® The Best Mail Solution For Your Business?

WorldPosta® Business Cloud Mail Service offers a wide range of features that will smooth your daily operations and boost your business.

## Switch to the Cloud!

### Minimum cost, maximum performance

Hosting your Email data in the cloud will boost your business, as it will drive down costs and eliminates the daily administrations headache that comes with an on-premise solution. Your data will be completely safe, fully accessible via any platform.

### High servers' availability

integrated with Amazon AWS Google Cloud Platform

WorldPosta® Servers are integrated with the full-fledged virtual cluster of servers of Amazon AWS and Google Cloud Platform, with availability zones located in 35 points around the world; this will guarantee you and your staff a quick access to your mailboxes.

### Maximum Deliverability Achievement

Switching to our service will improve your Email traffic's deliverability achievement rate. Unlike other mail services, WorldPosta® scores the maximum deliverability achievement for a business mail service.

### Available in every country in the world!

Unlike other services that are blocked in some regions, WorldPosta® Cloud Based Business Mail Service is available in all countries (such as China).

### 200 GB mailbox for every user

Expand your organization's capabilities. Don't limit your employees during their daily business tasks. You can send up to 35 MB in attachments.

## Access your mailbox anytime, anywhere

Your mailbox from WorldPosta® is at your fingertips, accessible from desktop and mobile devices. Active Synchronization & Outlook Anywhere:

WorldPosta® uses MAPI protocol to allow a full-active real synchronization between all your devices

## View attachment in Outlook and OWA

You can preview many different types of attachments directly in the Reading Pane.

(txt, docx, xlsx, pptx, pdf, etc....)

## Deleted items recovery

You can easily manage and set how long deleted items are kept in your mailbox. You can recover the deleted sensitive data items within 356 days, and 60 days for the permanently deleted items.

## Global Address List (GAL)

Allow your organization's staff to connect easily between each other, using the Global Address List to provide them with all contact information: Name, Email address, mobile number, etc.

Admins can add or remove contacts Information via WorldPosta® control Panel.

## Shared calendar

The most efficient tool to keep track of all of your upcoming meetings and business events;

Share calendar with a specific project team, share it with certain group or department or public.

You can set permission to view, modify events and appointments in the calendar.

## Dynamic Distribution List

Dynamic Distribution lists are mail-enabled feature created to speed up the mass sending of email messages and other information based on the filters and conditions that you define.

When an email message is sent to a dynamic distribution list, it's delivered to all recipients in the organization that match the criteria defined for that group.

Example: you can set rules for sending messages to certain department, certain job title, or a certain project team.

## MAPI Protocol

Messaging Application Programming Interface (MAPI) is the advanced and powerful messaging architecture, it accelerates the connection between your Email client and your mail server, and makes the messages passing operation more efficient and secured.

## Advanced Search: IncredibleSearch™

Search thoroughly into your mailbox. WorldPosta® advanced search feature “IncredibleSearch™” gets you full results from your messages body, and from the content of the attachments files; quickly and effectively.

### Control features from WorldPosta®:

## Simplified yet effective Control Panel

WorldPosta® introducing the best Control Panel, enhanced and developed for IT personnel in your company to have full control over managing your employees’ user accounts.

## Reviewing system

Sometimes you need to double-check a message before the message is sent to the recipient. Reviewer can reject or allow messages send from new employees and also provide comment on rejected messages.

## Setting group policies

You can set policies to enforce settings on a specific or a group of users or computers inside your organization’s domain.

## Messages tracking

Use group policies feature to set rules to track a specified word or subject in sent or received messages you want to follow up on.

## Monitoring users’ mailboxes

WorldPosta® monitoring tools help you monitor your team mailboxes.

## Security features from WorldPosta®:

### Intelligent, built-in anti-spam for every user

Email spam can affect your daily operations, reports estimate that 60% of the global email traffic is spam or a malware. For business mail that deals with a great amount of emails traffic every day, any malware or spyware can do a great harm to your data and network.

WorldPosta® uses many layers of security systems and anti-spams to scan inbound and outbound messages, and reduce the spam that reaches your mailbox.

### End-To-End Encryption (E2EE)

High efficient encryption between the two end points, only the two users can access and read the emails.

### Intelligent anti-spam filter & anti-viruses

Email can be vulnerable to threats that rises every day, WorldPosta® uses the most intelligent anti-spam techniques to clear your mailbox and make way for the daily important messages.

For zero-day-attacks protection, the built-in intelligent anti-virus uses sandboxing techniques that executes the unknown suspicious attachments before your reaching your organization network.

### Control over mobile devices:

Block any lost or stolen mobile device from accessing your mail, and completely erase all your sensitive data before reaching the not authorized personnel.

## 24/7 Technical Support

Our technical support engineers are active all the time to help you to solve any issues.

## WorldPosta Requirements

In order to use WorldPosta's features, you should meet the following requirements:

### **Internet Connection:**

WorldPosta business mail is a cloud based service, which means that all of your data are hosted on the cloud and the only way you can connect with the cloud is via internet.

It's recommended to have at least 1MB Internet plan (For every 25 users) to upload attachments bigger than 20MB.

### **Supported E-mail clients:**
